Design-Build Conferencing Solutions

What is the Dar•Ran Difference?

- The Rel-Viron® / BAC■GUARD™ Finish:
 - Anti-Microbial
 - Ⓛ certified fire retardant
 - 14 finish steps for depth and clarity
 - ANSI/KCMA approved
 - Low formaldehyde
 - High mar/scratch resistance
 - Chemical testing: Rel-Viron® was exposed for 24 hours to clorox, hot coffee, mustard, Matar™ sanitizer and permanent markers all of which had no effect on the finish.
- Skilled project management team assists with floor plan layout and will quote, order, tag, key, and ship each order by floor, by office to ensure installation ease.
- All products Made in High Point, NC USA.
- Built-to-order manufacturing ensures on time shipments with no backorders.
- Construction elements exceed BIFMA / ANSI standards.
- Each piece is assigned to a single craftsman and shipped fully assembled minimizing semi-skilled field assembly errors.
- Factory assembled configurations ensure fit and finish.
- Nationally located Factory Service Centers.

Dar•Ran appreciates the following corporations and facilities for investigating, comparing, and then selecting Dar•Ran products.

Due to limitations in the printing process, finishes shown here may not match actual finishes exactly. See actual samples for accurate representations. Due to natural color variations in the grain and color of wood, there may be slight variations in color from one piece to another. Exposure to light and the aging process may also cause darkening of natural wood products. Due to these factors, DAR•RAN does not guarantee exact matches from item to item. Please note: When ordering a light to clear finish, the natural characteristics and variations in the grain of the wood will be more apparent. When ordering a dark or medium finish the natural characteristics and variations in the grain of the wood will be more subdued providing a more uniform appearance. All colors shown in native wood species. Colors on different species, or custom color matches are available at additional costs.
